DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 24, 2008 has been entered.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the Applicant's Attorney (Mr. Brian A. Tent, with Reg. No. 57,446) on 11/10/2008, without traverse.

3. The claim 1 is amended in order to be tied to another statutory category (such as a particular apparatus), (Reference the May 15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Processes' under 35 U.S.C. 101" – publicly available at USPTO.GOV, "memorandum to examining corp"), as the following:

A moving-window, histogram equalization method of processing images, the method comprising:

breaking the image into a plurality of tiles; and

processing each of the plurality of tiles **with a processor** by:

obtaining a control parameter; wherein obtaining the control parameter includes obtaining a first control parameter and processing the first control parameter and the concentration ratio to obtain a second control parameter;

determining a histogram for one of the plurality of tiles;

determining a concentration ratio for the one of the plurality of tiles;

determining an area of the image that includes the one of the plurality of tiles and information outside the one of the plurality of tiles;

creating a first output by performing a histogram equalization on the area;

creating a second output based on the control parameter and the first output; and

using the second output to process the one of the plurality of tiles.

Reason for Allowance:

4. Applicant's response to the last office action, filed July 24, 2008 has been entered and made of record.

5. The following is an examiner's statement of reasons for allowance:

Independent claims 2, 17, 18, and 19 are allowable over the prior art of record.

Claims 3-9 depend from claim 2, therefore, are allowable.

Claims 13-14, and 16 depend from claim 17, therefore, are allowable.

Claims 25-27 depend from claim 18, therefore, are allowable.

Claims 28-30 depend from claim 19, therefore, are allowable.

Independent claim 2, recites the limitation of: "wherein obtaining the control parameter includes obtaining a first control parameter and processing the first control parameter and the concentration ratio to obtain a second control parameter";

Independent claim 17, recites the limitation of: "wherein processing the first control parameter and the concentration ratio to obtain a second control parameter includes determining a mathematical root of the group of the first control parameter, the concentration ratio, or both";

Independent claim 18, recites the limitation of: "wherein processing the first control parameter and the concentration ratio to obtain a second control parameter includes multiplying one of the group of the first control parameter, the concentration ratio, or both by a number;

Independent claim 19, recites the limitation of: “wherein processing the first control parameter and the concentration ratio to obtain a second control parameter includes combining the first control parameter and the concentration ratio”.

The closest reference of US 5,686,960 to Sussman discloses an image input device in which an optical deflector is positioned to divide the image of an object into a plurality of sub-images and to deflect the sub-images to an image sensor via an imaging lens. However, this reference, either by itself or in combination with other references does not teach the limitations of independent claims 2, 17, 18, and 19 as recited above.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance.”
